Displacement current, in electromagnetism, a phenomenon analogous to an ordinary electric current, posited to explain magnetic fields that are produced by changing electric fields.Ordinary electric currents, called conduction currents, whether steady or varying, produce an accompanying magnetic field in the vicinity of the current. The British physicist James Clerk Maxwell in the 19th century ...

### Displacement current | electronics | Britannica

Primary displacement is usually predictable and can therefore be mitigated through planning. "Secondary" or "indirect" displacement is a result of environmental, geographical and socio-political consequences of the development project that take place over time and distance from the initial project.

### Development-induced displacement - Wikipedia

Displacement is a complex process. It takes many forms and happens at varying paces and scales. To get better at designing community investment strategies that don't lead to displacement, we need to learn to recognize the numerous displacement pressures affecting housing stability and neighborhood choice. We also need to recognize the impacts ...

### Community Development | Gentrification and Displacement

The economy may suffer devastating impacts during and after a time of war. According to Shank, "negative unintended consequences occur either concurrently with the war or develop as residual effects afterwards thereby impeding the economy over the longer term". In 2012 the economic impact of war and violence was estimated to be eleven percent of gross world product (GWP) or 9.46 trillion dollars.

### Effects of war - Wikipedia

Displacement due to other reasons,such as natural disasters, flooding, or economic conditions,was found across strata, and most frequent in Lanao del Sur (15%) and Lanao del Norte (11%). Displacements due to other reasons were the longest, averaging 23.9 months. This mainly reflects long term economic displacement reported by respondents.

### Causes of Displacement | PeacebuildingData.org

Conflict-induced displacement consists of two main factors: 1) The violence that caused the displacement and 2) The characteristics of the resulting displacement crisis. Many observers fail to disaggregate each factor; rather lumping all types of violence together or viewing displaced people as an undifferentiated mass.

### Causes and Consequences of Conflict-Induced Displacement ...

The consequences of displacement of the vertebrae depend on the department in which the displacement occurred, and which vertebra became unstable. With the shift in the cervical region there are severe headaches, increased pressure, there are problems with sleep, muscle spasms of the neck, shoulders, pain in the hands, weakening of reflexes, problems with vision, hearing, difficulty swallowing, chewing.

### Displacement of vertebrae | Symptoms and Treatment of ...

If you have a plane of symmetry, that sets the displacement normal to that plane to 0. If the normal to a plane of symmetry was the Z axis, and you put both symmetry and a Z=0 displacement constraint on the face, the result would be that the nodes on that face would have a Z=0 constraint. There is no problem specifying the same constraint twice.
