9 1 Identifying

Quadratic Functions

Quadratic Function. a function that can be written in the form $f(x)=ax^2+bx+c$, where a , b & c are real numbers and a is not equal to zero.

Parabola. the graph of a quadratic function is a curve called a.

Vertex. the highest or lowest point on the parabola (ordered pair)

linear functions. These were function whose graphs formed lines.

Notes for Lesson

9-1: Identifying Quadratic Functions

A quadratic function is any function that can be written in the standard form $y = ax^2 + bx + c$, where a , b , and c are real numbers and $a \neq 0$.
