Try ArcSight Logger’s automated reporting tools. Compliance reports for PCI, SOX, etc. available for the full version. Centralized Event Logging. Gain centralized, company-wide visibility by ingesting data from over 480 data types (full version). Investigation and Forensics.

ArcSight Logger - Free Trial | Micro Focus

By default, if ArcSight Logger is installed by a root user, ArcSight listens on UDP port 514 and TCP port 515. If ArcSight Logger is installed by a non-root user, the default UDP port is 8514 and the TCP port is 8515. In this example, syslog messages are sent with UDP in a topology where ArcSight Logger is installed by a root user.

HP ArcSight Data Platform Integration Guide

ArcSight Logger ArcSight Logger provides cost-effective long term log management and storage, as well as automated compliance reporting. By storing up to 42 TB of log data on a single appliance while supporting search speeds of millions of events per second across structured and unstructured data. ArcSight

ArcSight SIEM Partner Guide - Cisco

ArcSight enables both simple and complex automated responses, out-of-the-box, that can be triggered on-demand or by specific alerts. It can even report back if additional response is needed. In addition to this, ArcSight also integrates with leading SOAR and digital workflow solutions such as ATAR Labs and ServiceNow.
