Managing Major Hazards The Lessons Of The Moura Mine Disaster

Running a safe, responsible and profitable business requires us to manage major hazard risks and do everything we can to prevent catastrophic events, including those involving tailings and water storage facilities, chemicals, underground mining and process safety. We identify major hazard risks (low probability, high consequence events) and manage them by verifying controls, conducting external reviews and requiring compliance with standards and procedures - such as our tailings and water ...

This site aims to bring together information about mining accidents and disasters to make it easier for current and future mining communities to have access to the lessons of the past. In his book, *Managing Major Hazards - Lessons of the Moura Mine Disaster*, Professor Andrew Hopkins raises the issue of repeating previous accidents.

Home - Mine Accidents and Disasters

While after action reviews produce valuable lessons, lessons alone are not the end of the story. In fact, lessons learned should rightly be the beginning of a new chapter in a fire department's operational behaviors. Lessons without a corresponding change in operational behavior are not lessons learned.

Operational Lessons Learned in Disaster Response

leader in safety management. The need to reduce the number of accidents and improve safety standards is well understood throughout the industry if a repeat disaster is to be avoided. At the core of the industry's safety management campaign is the goal setting regulatory framework which tackles responsible and effective major hazard management.
