Mysticism And The New Physics

Mysticism and the New Physics is one of the most remarkable books I have ever read. It left a lingering impression since I encountered the first publication early in the early 1980's and the power of this work has not diminished in the least in the updated version, revised in 1993, which I re-read quite recently.

My study of physics-mysticism parallelism is a vehicle for exploring epistemic strategies. I thus conclude Part I by sketching a materialist, emancipatory epistemic strategy. My conclusion brings together a number of ideas formulated by myself and others over the past several years, but stops short of a systematic synthesis.

Mr. Talbot's other book, "The Holographic Universe" is a phenomenal work and is relatively easy to read, especially if one has a science and math background. This book "Mysticism and the New Physics" I find difficult to follow. Seems like just a bunch of random thoughts without much connection between them.

For millennia, mystics have known via direct cognition what Bell's theorem has only fairly recently revealed to the world of science. The mystic experiences the nonlocal, interconnected/entangled nature of consciousness and reality directly, and in doing so, understands it (in a holistic, existential sense).

A Bridge to the Mystical: The Entanglements of Physics and ...

Mystics and "idealists" have always propounded the idea that the world is an illusion. Now quantum physics is putting forward theories that reinforce this belief. Until recently, the empirical approach of physicists such as Newton has taught us that the world exists with or without human consciousness to observe it.
