EBM Medical - Evidence based therapies at affordable prices.

Epidemiology and EBM Education. The goal of this Program is to promote the application of the epidemiologic principles and population medicine to clinical practice. Our activities include courses in epidemiology and evidence-based medicine for all levels of practitioners at the medical school. We also provide training in the teaching of evidence-based medicine and in the advanced skills required for clinical and administrative leadership positions in clinical and academic medicine.

Epidemiology and EBM Education | McGovern Medical School

The practice of evidence-based medicine is a process of lifelong, self-directed, problem-based learning in which caring for one's own patients creates the need for clinically important information about diagnosis, prognosis, therapy and other clinical and health care issues.
