background and procedure from the experiment manual and studied the related theory. The lab instructor may, during the experiment, ask students questions pertaining to the procedure and theory. The lab instructor may give negative points to and even prevent an unprepared student from conducting the experiment.

ELECTRIC CIRCUITS LABORATORY MANUAL

When reactions are carried out at constant pressure (for example, in open containers in a chemistry lab), the heat change is proportional to the

enthalpy change, ΔH . By convention, if heat is released from a chemical system to the surroundings, that reaction is classified as exothermic, and the sign of the enthalpy change is negative ($\Delta H < 0$).
