Systems design;
Systems Analysis. It is
a process of collecting
and interpreting facts,
identifying the
problems, and
decomposition of a
system into its
components. System
analysis is conducted
for the purpose of
studying a system or
its parts in order to
identify its objectives.
It is a problem solving
technique that

(e)System Design

Based on the user requirements and the detailed analysis of the existing system, the new system must be designed. This is the phase of system designing. It is the most crucial phase in the develop-ments of a system. The logical system design arrived at as a result of systems analysis is converted into physical
